

INTERNSHIP in ENVIRONMENTAL EDUCATION at the DAUPHIN ISLAND SEA LAB Summer 2018: May 30 – August 1

The Discovery Hall Programs at the Dauphin Island Sea Lab has an **internship** available for an **undergraduate student** (junior, senior, or recent graduate) from groups currently **under-represented in marine science and environmental education**. Our interns assist DHP education staff in our many summer programs for K-12 students, teachers and the public.

Located ~45 minutes south of Mobile, AL, the Dauphin Island Sea Lab (DISL) is the marine research and education facility for the state of Alabama. DISL's Discovery Hall Program offers a variety of summer camps, classes, workshops and outreach events providing interns with an introduction to the fields of environmental education and marine science while working at the beach! DISL is a busy place in the summer with many opportunities to network.

Internship includes a \$3,500 stipend, room, and board.

The successful candidate should be interested in marine science and environmental education and have completed a minimum of one year of biology or education classes. Interns live in the Sea Lab dorms and are expected to work some nights and weekends. Interns should like people, including children, be comfortable in the water, have a valid US driver's license, and be capable of handling some strenuous physical activity, as well as Alabama's summer heat and humidity.

Visit <https://www.disl.org/dhp/internship-opportunities> for further information. Contact Ms. Sara Johnson at (251) 861-2141 x7515 or DHPsummer@disl.org with questions.
